

Last Will and Testament *of* *William David Smith*

This sample does not include all of the options available to you but it will give you an idea of the look and feel of our documents. It is missing the crucial first and last pages. The first page would normally give you full instructions (and some tips) on how to complete your Will and what to do with it when it has been signed and witnessed. The last page (also missing) contains the signature details.

NB you cannot simply copy this document and end up with a legal document.

If you have been shopping around you might notice that our document is quite lite on legal jargon. We have removed as much legal mumbo jumbo as we can so that your document is easily understood by you and your executors. When the time comes to read your Will – and hopefully that will be a long long time in the future - Wills from other providers that are loaded down with legal jargon will need an expensive legal professional to translate it. That's taking money away from your loved ones.

So we save you money today by providing a low cost solution to your Will making needs. And we save you money in the future by reducing (or eliminating) any legal costs when the Will is read.
